

Ella

Australia
Dual Purpose Hop

Ella is a new aroma variety grown in Tasmania which contributes a combination of floral hints of anise. It is reminiscent of, yet distinctly different in character to noble European varieties, and provides a contrast to the citrus and tropical fruit characters of many modern “flavor hop” varieties. Ella grows vigorously, producing moderately large, dense cones.

Pedigree	Australian breeding material
Aroma	Spice and floral
Alpha Acids*	14.0 - 16.0 %
Beta Acids	4.0 - 4.5 %
Cohumulone	34 - 38 % of alpha acids
Total Oil	2.5 - 3.0 ml/100g
Myrcene	32 - 34 % of total oil
Humulene	14 - 16 % of total oil
Caryophyllene	14 - 16 % of total oil
Farnesene	1 - 2 % of total oil

* Alpha acids are determined by conductometric titration (EBC 7.4) in Europe; by spectrophotometric (ASBC Hops-6) in USA
