

Target

U.K.

Bitter Hop

Bred at Wye College in the UK, Target was released in 1972 and is a widely grown British hop. It has a very high bitter value, very good stability and a very good intense aroma. Target is a flexible hop that may be used to effectively bitter a wide variety of both Ales and Lagers. Target has a high tolerance to wilt and resistance to powdery mildew but is susceptible to downy mildew.

Pedigree	Bred from Challenger
Aroma	Intense, pleasant English aroma
Alpha Acids*	9.5 - 12.5 %
Beta Acids	4.3 - 5.7 %
Cohumulone	35 - 40 % of alpha acids
Total Oil	1.2 - 1.4 ml/100g
Myrcene	45 - 55 % of total oil
Humulene	17 - 22 % of total oil
Caryophyllene	8 - 12 % of total oil
Farnesene	< 1 % of total oil
Storage Stability	Poor to very poor

* Alpha acids are determined by conductometric titration (EBC 7.4) in Europe; by spectrophotometric (ASBC Hops-6) in USA
