

Wye Challenger

Growing Area - U.K.
Dual Purpose Hop

Wye Challenger was developed at Wye College from a cross made in 1963. It is strongly resistant to downy mildew disease and was selected to meet the brewers' demand for flavor and bitterness as well as the growers' demands for disease resistance.

Pedigree	Bred from Northern Brewer and Target
Aroma	Floral, spicy with some fruity
Alpha Acids*	6.5 - 8.5 %
Beta Acids	2.5 - 4.3 %
Total Oil	1.0 - 1.5 ml/100g
Myrcene	28 - 32 % of total oil

* Alpha acids are determined by conductometric titration (EBC 7.4) in Europe; by spectrophotometric (ASBC Hops-6) in USA
